

CAN-EtherCAT

EtherCAT®-CAN Gateway

EtherCAT®

Seamless Connection between EtherCAT and CAN

- High-speed CAN interface (ISO 11898-2)
- 100BASE-TX EtherCAT interface (IEEE 802.3)

User-Friendly Configuration

- Configuration via EtherCAT master and standard EtherCAT configuration tools
- EtherCAT slave functionality according to ETG Modular Device Profile No. 5000

EtherCAT Network Extension

- Ethernet-over-EtherCAT (EoE) support to connect Ethernet devices to EtherCAT
- Firmware upgradable

Linking EtherCAT and CAN

The CAN-EtherCAT gateway can link CAN modules with CANopen® (CiA® DS 301) or layer-2 (ISO 11898-1) implementation to a real-time EtherCAT network. The EtherCAT slave functionality is in accordance with ETG Modular Device Profile No. 5000.

The module can also be configured as Ethernet switch port using the EoE protocol.

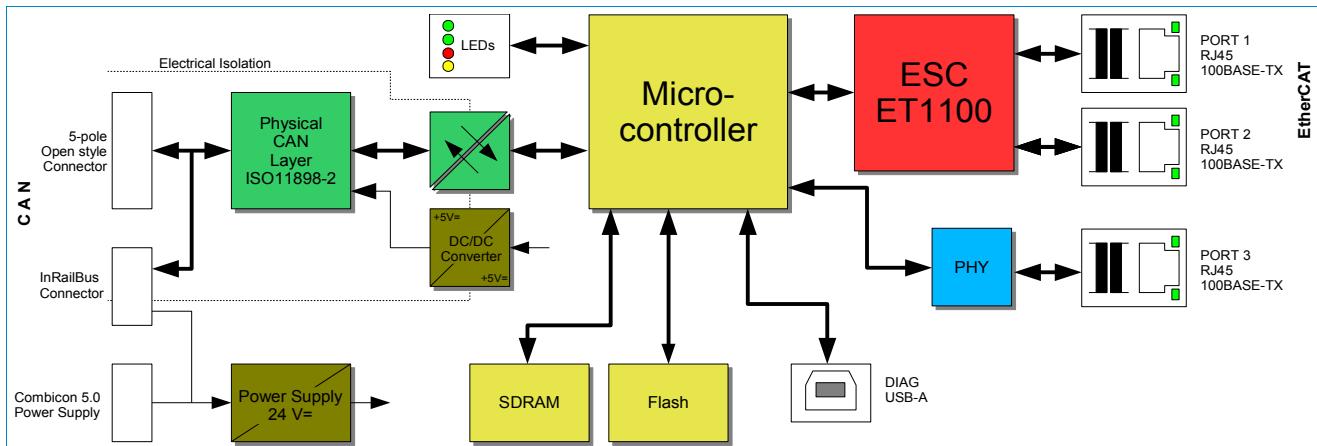

Firmware updates are possible via web interface (EoE) or FoE (File access-over-EtherCAT).

Physical Interfaces

The CAN high speed (ISO 11898-2) compatible interface allows a maximum data-transfer rate of 1 Mbit/s. The 100BASE-TX EtherCAT interface is compatible to IEEE 802.3 and runs with 100 Mbit/s.

The EtherCAT as well as the CAN interface are electrically isolated.

Technical Specifications:

CPU:

Microcontroller ARM9, 200 MHz

Memory 32 MB SDRAM

CAN:

CAN controller ISO 11898-1

CAN interface 5-pin open style 3.81 (CiA DR 303-1), 50 kbit/s - 1 Mbit/s, ISO 11898-2, electrically isolated

EtherCAT Slave Controller (ESC):

ESC ASIC ET1100

ESC interface 2x RJ45, 100BASE-TX, 100 Mbit/s, IEEE 802.3, electrically isolated

General:

Operating voltage Nom.: 24 VDC / 150 mA
Min./max.: 18 VDC / 32 VDC

Ambient temperature 0...50 °C

Relative humidity Max. 90%, non-condensing

Dimensions 22.5 mm x 99 mm x 114.5 mm
(dimensions without mating connectors)

Weight 130 g

Connectors CAN: 5-pin open style, 3.81
EtherCAT: 2x RJ45
Power: 4-pin open style, 5.0

Order Information:

Hardware	Order No.
